Our Vision for ICT & E-learning

At Manaia View School all learners will use ICT tools to confidently and creatively help and develop the skills and knowledge they need to become life long digital learners.

Principles of e-Learning which is integrated across all curriculum areas:

- Focus on elearning as an integrated tool
- Focus on process and reflection

• School planning that identifies core tools and strategies to be used throughout the school.

Thinking strategies (eg

Smarts, Six hats, Inquiry e.g. Big 6, Graphic organizers,

Blooms taxonomy, Habits of the Mind)

- School wide identification and implementation of teaching and learning theories that support desired learning programmes. Professional development to support this.
- Elearning will support the Key Competencies.

Elearning is happening in all classrooms and this occurs because there is a:

- commitment to ICT from the BOT, community, staff and students.
- focus on multi literacies including media
- commitment to PD , international, national and local opportunities
- an authentic use of ICT to enhance opportunities and audience.

• industry links are maintained and strengthened

- articulation of learning by students
- use of thinking strategies in the classrooms and in teacher and student language.
- culture of collaboration and facilitating the sharing of best practice within the school

• budget for ongoing PD and reliable, sustainable and effective infrastructure, equipment and services are provided to enable effective teaching and learning.
